**2nd Congress on Applied Synthetic Biology in Europe. 25-27 November 2013 - Málaga - Spain**

### **Second symposium on industrial applications of synthetic biotechnology**

Our successful first meeting revealed that there are no rigid lines of division between synthetic biology, metabolic engineering, and systems biology, all of which are relevant to developments at the frontiers of bioprocessing, biochemical engineering, medical biotechnology, and the biopharmaceutical industries. This will therefore be a joint meeting of three EFB Sections:

**EFB Section on Microbial Physiology**

**EFB Section on Applied Biocatalysis**

**EFB Section on Biochemical Engineering**

The second meeting in the series will cover all aspects including plant synthetic biology, but inevitably with a strong emphasis on microbial synthetic biology. By holding the meeting where accommodation is available, interactions between diverse groups of participants will be optimised, consistent with the multidisciplinary character of the EFB.

II**

June 17-21 2013

Olomouc - Czech Republic

Organised by the EFB RBO Centre of the Region Haná for **Biotechnological and Agricultural Research**, this conference will promote collaboration in the frontier areas of plant biotechnology research, development and innovations. During the conference, scientists from academic institutions and companies will have the opportunity to meet with students. A workshop strengthening the cooperation of the industry and academia will be organized. Conference language will be English.

### What is the Microbial Resource Research Infrastructure, MIRRI?

**MIRRI** builds a Pan-European distributed research infrastructure that provides microorganisms services facilitating access to high quality microorganisms, their derivatives and associated data for research, development and application. It connects resource holders with researchers and policy makers to deliver the resources and services more effectively and efficiently to meet the needs of innovation in biotechnology.

### New Biotechnology Special Issue: 15th European Congress on Biotechnology (ECB15), Istanbul, 23-26th September 2012

**European Congresses of Biotechnology** have been sponsored by the European Federation of Biotechnology since 1978. Although the 2012 Congress was the 15th in the series, it was the first to be held outside of mainstream European states, to the Eastern limit where Europe meets Asia.

## Upcoming Events

### **PYFF - 5th Conference on Physiology of Yeast and Filamentous Fungi. 4-7 June 2013**

**EFB Section on Microbial Physiology**, is organizing the 5th Conference on Physiology of Yeast and Filamentous Fungi (**PYFF 5th**) on Montpellier- France. During the last years, the explosion of comparative and functional genomics, the development of system and synthetic biology and the expansion of metabolic and evolutionary engineering, have boosted up our understanding of these eukaryotic models and led to exiting developments in the biotechnological, food and pharmaceutical industries. The 5th PYFF is a unique opportunity to explore the latest advances in the basic and applied aspects of the physiology of these eukaryotic models and for exchanges between the yeast and fungal research communities

### **7th International Conference on Environmental Engineering and Management - Integration ICEEM. 18 - 21 September 2013. Vienna - Austria.**

7<sup>TH</sup> INTERNATIONAL CONFERENCE ON  
ENVIRONMENTAL ENGINEERING AND MANAGEMENT  
Integration Challenges for Sustainability

The **EFB Section on Environmental Biotechnology** is promoting **ICEEM**. This ICEEM edition seeks to bring together researchers, practitioners and specialists in various environmental fields, with a strong focus on integrating cutting-edge environmental technologies with efficient management practices, contributing thus to a sustainable future.
